

**COORDINATED
DEGREE OFFERINGS
MBA/PSM PROGRAM**

Rice's Professional Science Master's program was established to prepare a future generation of industry leaders who can help maintain America's competitive edge in the global marketplace and fill positions transforming traditional boundaries between the academic and the corporate worlds. Our program was developed in collaboration with industry advisors ensuring that graduates will possess both academic and professional skills to effectively bridge science and business.

To further strengthen students' education, the Jones Graduate School of Business offers a three-year coordinated degree option with the MBA and Professional Science Master's program at Rice's Wiess School of Natural Sciences, which offers MS degrees in **four areas of focus**. Students complete courses in one of the five degrees along with management coursework for their MBA.

COURSE REQUIREMENTS

- 75 hours of coursework including 30 in a science discipline and 45 credits of management coursework
- Satisfy all MBA core curriculum requirements
- Satisfy all Professional Masters MS track specific requirements
- Course schedules will be planned in consultation with the PSM program director and MBA program
- PSM internships are required, MBA internships are highly recommended
- All requirements can be fulfilled within two and a half to three years (1st year- PSM, 2nd and 3rd year/final semester MBA with some PSM electives)

ADMISSION REQUIREMENTS

All applicants applying to the MBA/PSM coordinated degree program must complete a separate application to the Full-Time MBA program and their science program of choice. Please note acceptance into one of the programs is not contingent upon the other. You could be admitted to one and not the other.

- All application requirements for the specific science department can be found at profms.rice.edu
- All application requirements for the Full-Time MBA program can be found at business.rice.edu/admissions

PROGRAMS OPTIONS

- Bioscience and Health Policy
- Environmental Analysis
- Space Studies
